

Preventive Dentistry Is Good for Your Smile *and* Your Pocketbook

You know regular visits to **our Oklahoma City office** are important. Seeing **Dr. Kirk, Dr. Henry, or Dr. Proud** twice a year gives us a chance to thoroughly inspect your smile and assess problems that could cause trouble for you if left untreated—problems like tooth decay, gum disease, and even fractures. Catching problems like these sooner rather than later helps us reduce your potential for trouble down the road.

And while that's good news for your oral and your overall health, it's also good news for your pocketbook, especially in these tough economic times. Restorative and general procedures like **fillings, gum disease therapy, and crown placement** can put a heavier burden on patients if a lot of work is needed.

So how can you avoid paying for expensive procedures? By coming in regularly for your checkups!

Come See Us Soon! Your First Visit Is On the House!

Dr. Kirk, Dr. Henry, and Dr. Proud want to help you have a strong, healthy smile that you can be proud of. And to make getting started that much easier, your first visit with us is on the house.

When you come in, the first thing we'll do is just spend some time getting to know you. Then, we'll get started with your oral exam. After we've have a chance to look at your smile tooth by tooth, we can help you determine if any further treatments are necessary to help you.

Call us today to schedule your **FREE First Visit™** with **Dr. Kirk, Dr. Henry, or Dr. Proud**. Whether you live in **Nichols Hills** or elsewhere in the greater **OKC area, Grand Dental** can help you.
